CSS Selectors Assignment

Objective: Practice basic CSS selectors to style a webpage creatively.

Instructions:

1. Create a simple webpage with:

   - A heading, a paragraph, and an unordered list with at least 3 items.

   - Add a button and a footer at the bottom.

2. Use the following basic selectors to style your page:

   - Type selectors to style the heading, paragraph, and list items.

   - Class selectors to style at least two elements differently.

   - ID selectors to apply a unique style to the footer.

Bonus Task (Optional):

1. Use the universal selector (*) to apply a default style for the entire page (e.g., font-family or background).

2. Add an attribute selector to style the button (e.g., [type="submit"] or [type="button"]).
