CSS Fundamentals Assignment

Objective: Apply what you've learned about the different ways of styling a webpage using CSS.

Task:

1. Create a simple webpage with the following:

   - A heading (<h1>) that introduces a fun topic (e.g., "My Favorite Hobbies").

   - A paragraph (<p>) with a brief description of something exciting or interesting (e.g., why you love a certain hobby).

   - A list (<ul>) with at least three items that list things like hobbies, interests, or goals.

2. Styling requirements:

   - Inline CSS: Add a style to one of the list items (e.g., change its color or font size).

   - Internal CSS: Use the <style> tag to add a unique style to the heading and the paragraph (make them pop!).

   - External CSS: Create a separate .css file and link it to your HTML page. Apply two different styles to the list and footer (think about text color, font, etc.).
